HyperTransport Consortium Developers Conference To Highlight Latest Technology Benefits and Member Company Case Studies

High-Profile Member Companies To Present on Low Latency HyperTransport 3.0 and HTX Connectivity Successes

SUNNYVALE, Calif., October 24, 2006 – The HyperTransport™ Technology Consortium, a non-profit organization dedicated to developing, promoting and licensing the industry's lowest latency, highest bandwidth interconnect technology, today announced its annual HyperTransport Technology Developers Conference will take place Thursday, October 26, 2006, at the Santa Clara Marriott Hotel in Santa Clara, Calif. This event will include presentations by member companies focused on a variety of HyperTransport 3.0 and HTX implementations and it will provide the Consortium community audience with HyperTransport technology and market updates.

“This has been a pivotal year for the HyperTransport Consortium, with the addition of new, high profile members, technology developments and innovative market applications,” said Mario Cavalli, general manager of the HyperTransport Consortium. “Our 2006 forum will be a primary opportunity to discuss and showcase some of the latest application breakthroughs for HyperTransport, while offering member companies a venue to engage in valuable networking with other HyperTransport experts.”

Member companies Advanced Micro Devices (AMD), Celoxica, Cray, DRC Computer, Fabric7 and GDA Technologies will discuss their leading-edge implementations of HyperTransport 3.0 and HTX technology. Celoxica will also elaborate on its recent announcement of the first complete off-the-shelf hardware and software compiler design bundle for High-Performance Computing (HPC) based on standardized HyperTransport HTX interconnect slots. (For more details, view complete press release at http://www.hypertransport.org/consortium/cons_news.cfm?m=1.)

HyperTransport Consortium members can register for this event today at http://www.hypertransport.org/consortium/htc_devcon_register.cfm.

About the HyperTransport™ Technology Consortium

The HyperTransport Technology Consortium is a membership-based, non-profit organization that manages, promotes and licenses HyperTransport Technology. The HyperTransport Consortium consists of over 40 industry-leading member companies, including founding member Advanced Micro Devices, Alliance Semiconductor, Apple, Broadcom, Cisco Systems, NVIDIA, PMC-Sierra, Sun Microsystems and Transmeta. Membership is based on a yearly fee and it is open to any company interested in licensing the royalty-free use of HyperTransport technology and intellectual property. Consortium members have full access to HyperTransport technical documents database, they may attend Consortium meetings and events and may benefit from a variety of technical and marketing services, including the new, member-driven web portal, whose business benefits are part of a wide array of services offered by the Consortium free of charge to member companies. To learn more about member benefits and on how to become a Consortium member, please visit the Consortium Web site at www.hypertransport.org.

HyperTransport is a licensed trademark of the HyperTransport Technology Consortium. All other trademarks belong to their respective owners.
